

February 28 1942

Mr. Roice B. Nelson, Chairman
Coal Creek Water Users Committee
Cedar City, Utah

Dear Sir:

RE: COAL CREEK DISTRIBUTION

The time is approaching when the water users of Coal Creek should assemble in a meeting to make recommendations to the State Engineer for appointment of a water commissioner for the season of 1942, the duties he or they shall perform, together with the compensation recommended, if such commissioner or commissioners be desired, and transact any other business which might properly come before the meeting.

This meeting date is suggested as being during the evening of March 17, as it is contemplated a similar meeting will be held with Beaver River users during the same day, and with Santa Clara River users the following day. If this date meets with your approval, kindly so indicate by return mail, giving the suggested meeting place in order that notices may be given of such meeting to the water users as required by law. Due to the fact that this date fits in with the schedule of other similar meetings being held throughout the State, it is suggested that it be adhered to.

Yours very truly,

Ed. H. Watson
STATE ENGINEER.
